**NOTICE OF FILING OF EXTENSION OF APPROVAL FOR PIR PROGRAM
PUCO Case No. 20-1634-GA-ALT**

Dear Public Official:

On October 15, 2008, the Public Utilities Commission of Ohio (PUCO) approved an increase in Dominion Energy Ohio's (Dominion) rates and charges for service. In its order authorizing the increase, the PUCO also approved a tariff to recover certain costs associated with a pipeline infrastructure replacement (PIR) program and approved Dominion's request to assume ownership of, and responsibility for, curb-to-meter service lines as Dominion installs, repairs, ties in, or replaces them. At that time, the PIR Cost Recovery Charge was set to zero. The PUCO approved Dominion's initial adjustment to the PIR Cost Recovery Charge on December 16, 2009, and has approved periodic adjustments thereafter.

Modifications to DEO's PIR program and an extension of the program for another five-year period were approved by the PUCO on August 3, 2011, including changes to the scope of the program and transition of the PIR Cost Recovery Charge adjustment filings from a fiscal-year to a calendar-year basis. An additional five-year extension with program modifications was approved by the PUCO on September 14, 2016, in Case No. 15-362-GA-ALT; this authorization is set to expire at the end of 2021.

On October 30, 2020, Dominion notified the PUCO of its intent to file an application seeking approval to extend the PIR program to recover costs associated with investments made through December 31, 2026. This application is not for the recovery of any costs, and approval of this application will not result in the approval of a new charge or increase in rate at this time. Dominion seeks to continue increasing capital investment by 3% per year as currently authorized. This provision of the program would permit annual increases in future PIR Cost Recovery Charges ranging from approximately \$1.72 to \$1.82 per month for each year of investment from 2022 through 2026. Other changes to the PIR program and PIR Cost Recovery Charge may be proposed by Dominion or ordered by the Commission. Hard copies of the application will be made available on request; the application and other case materials may also be viewed by visiting the website <http://dis.puc.state.oh.us> and entering "20-1634" in the Case Lookup field.

Dominion's replacement of older vintage pipelines and its ongoing investment in pipeline infrastructure will enable us to continue providing safe and reliable natural gas service to our more than one million customers. Because Dominion is now responsible for curb-to-meter service lines, customers no longer face the prospect of large unanticipated outlays for repairing those lines should it become necessary. We appreciate the opportunity to serve your community and look forward to answering any questions you may have regarding this notice.
