Design Summary: The Cudell Commons Concept Design focuses on highlighting the needs of the Cudell Commons neighborhood. Through community engagement and surveys, we have gathered what is most important for the users of this space and have used it to create a design that celebrate the legacy of Cudell Commons. The design uses history as an educational tool for the community and for all who visit the park. This approach emphasizes the preservation of nature, social connectivity, multigenerational engagement, and ADA accessibility.
