

Division of Water - Cleveland Public Power - Water Pollution Control

Request for Legislation

An ordinance authorizing the Department of Public Utilities (DPU) to enter into requirement contracts of labor and materials necessary to test, maintain, and repair back-up electrical power, backup diesel drives for pumps, backup generators supplied by off-road fossil fuel, fuel testing, fuel conditioning and recycling of diesel fuel, testing, maintenance, and replacement of underground storage tanks, including but not limited to, providing repairs and emergency services, maintenance and replacement as required, for the various divisions of the Department of Public Utilities, for a two year term.

Background/Purpose:

DPU has numerous facilities, including water filtration plants, pump stations, sewage lift stations, electrical sub-stations and office buildings, each of which has a variety of backup power equipment, including turbine generators, diesel electric generators, diesel drives for water pumps, propane electric generators and power conditioning equipment. This equipment must be maintained on an ongoing basis.

Scope of Work/Commodities/Services:

The scope of work includes labor and materials necessary to test, maintain, and repair back-up electrical power, backup diesel drives for pumps, backup generators supplied by off-road fossil fuel, fuel testing, fuel conditioning and recycling of diesel fuel, testing, maintenance, and replacement of underground storage tanks, including but not limited to, providing repairs and emergency services, maintenance and replacement as required

Justification/Urgency:

The operation and integrity of the backup power generating and conditioning equipment are critical to the integrity of the systems that provide electricity, remove sewage and produce drinking water for the population of the City and neighboring communities. If these backup power systems are not maintained or refurbished, DPU's ability to provide those services becomes impaired.

Anticipated Costs and funding source:

This requirement contract(s) is estimated to cost \$800,000.00 over its life. Operating or Capital Funds will be used as appropriate.

Schedule or Term of Contract:

Legislation will lead to requirement contracts for the term of two years.

Current Contract(s):

Vendor Company Name	Vendor Address/Contact	Services/Worked Performed under contract	Contract Info
Ohio Machinery Co. DBA/ Ohio Cat	3993 East Royalton Rd. Broadview Hts., Ohio 44147 Bob Shimko	Maintenance/Repairs of diesel powered generators.	Contract #: 2017-005 Awarded Amt: \$761,892.00 Contract Exp Date: 2/08/2021

Warner Diesel Filtration	2303 Cole Creek Dr. Norwalk, OH 44857 Dave Warner	Filtration of diesel fuel for generators.	Contract #: 2017-035 Awarded Amt: \$26,800.00 Contract Exp Date: 4/18/2021
--------------------------	---	--	--

CSB Participation on the Current Contracts:

Goals: 20 %; Actual CSB Participation: 0 %

If there is no CSB participation, explain why here:

The goal for Backup Generators and Fuel Testing and Filtration was waived.

Vendors on the ITB Mailing List that Led to the Current Contracts(s):

See attached mailing list.
