

Department of Port Control

Ordinance No.: 1171-2024

Executive Summary

The Department of Port Control ("Department") is requesting authority to purchase by one or more requirement contracts of fencing, gates, and guardrails, including labor and materials for the repair and maintenance of gates, fencing, and guardrails and other related items, including installation if necessary, for the Department of Port Control, for a period of two years, with two one-year options to renew, exercisable by the Director of Port Control.

Background/Purpose:

The Department is required to maintain all fencing and gates in accordance with FAA part 139 regulations for airport safety and security for both Cleveland Hopkins International and Burke Lakefront Airports.

Cleveland Hopkins International Airport is surrounded by 15 ½ miles of perimeter fence, which is required to provide security to the airfield, pursuant to FAA and Department of Homeland Security directives. Additionally, there are thirty airfield gates which permit airport personnel and contractors secure access to various locations on Airport property. It is critical for the Airport to maintain these fences and gates, and to have a qualified contractor who can respond immediately on a twenty-four-hour basis to perform emergency repairs to maintain airport operations and comply with applicable security directives.

Scope of Work:

To provide gates and fencing to secure the airport perimeter. Work to include labor, parts, and materials, including installation, for the Department of Port Control.

Schedule or Term of Contract:

Two years, with two one-year options to renew, exercisable by the Director of Port Control.

Anticipated Costs:

Approximately \$75,000 annually

Current Vendors/ Contracts:

Vendor	Vendor Address	Contract No.
