Recycling Challenges

Material Recovery Facilities - MRF's

- **Kimble** Twinsburg
- **Republic** Oberlin
- **Waste Management** Akron
- **Rumpke** Columbus and Cincinnati

Current Equation

Export limitations =

Supply glut =

Lower prices +

Higher quality standards =

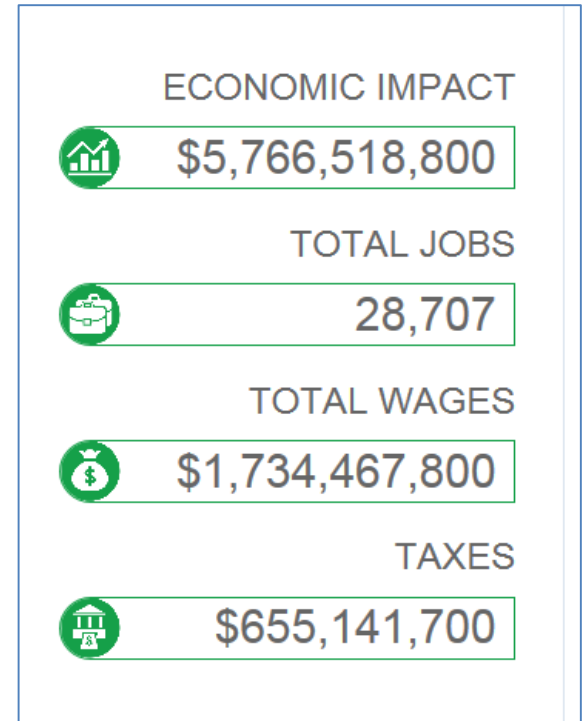

Higher processing costs =

“Blended value” of materials (after processing) is in the negative range

What Does the Future Hold

- Brighter picture for fiber - domestic markets for paper and cardboard are growing – PRATT (Ohio)
- Domestic markets and technology for plastic beyond PET and HDPE need to be developed – BRIGHTMARK (Indiana)
- Recycling's importance to the economy and the environment will continue to grow
